New NSPI Meeting in Format A Great Success

The July meeting introduced NSPI San Diego to a new meeting format.

We met at the San Diego Safety Council Building. The room was more like a classroom than a banquet hall. This made it very conducive to discussions among members and guests.

The food was pizza, soft drinks and beer. Lots of it to go around. No one left hungry. Some members even took some home for the dog.

We had two very good speakers. Mike Fitzgibbon, JJJ Cosmetics spoke about skin protection for contractors and their crews that work in the sun all day. Does that sound like anyone that you know? The message? Wear sun screen. Use lots of it. Use it often. Most of us never knew the serious risks. (How many of us manly dudes went home that night and tried out the wife's moisturizer?)

Cheena Malicki, San Diego Safety Council, warned us about heat stress. She gave us great tips for avoiding it and what to do if one of our crews is hit by heat stress.

Looking at today's workers comp rates, we all needed this information.

After a great meeting we were still able to get home to our families at a reasonable time.

Alas, its back to the Hilton one more time in September.

Presidents Letter

Greetings

I hope everyone is surviving the summer! Recently, I had the opportunity to attend the NSPI region meeting. The main emphasis of the meeting was to focus the region and chapter attention on providing member enrichment.

To much attention has been paid to member recruitment and we are going to redirect our energies toward helping members and adding value to your membership. San Diego is taking steps towards this through our new chapter meeting format. Speaking of which, I invite you to attend the next chapter meeting September 14. We once again will be meeting at the San Diego Hilton. Please take the time to read the flyer in the newsletter and don't forget to RSVP. See you there!

The NSPI Leadership conference in San Diego was a very educational experience. It was an opportunity to see the plans for the pool industries future. According to the experts, the economy will continue to be strong and the pool and spa industry should continue to prosper. NSPI is also implementing a new pilot program, funded by manufacturers, to promote the swimming pool industry and the lifestyle associated with owning a swimming pool.

The "Pool Pro" program will be a large scale advertising campaign designed to encourage customers to build a backyard pool and encourage consumers to become " Pool People"

A gentle reminder that the Design Awards are rapidly approaching and its time to take pictures.

I look forward to seeing everyone at Septembers meeting .

Phil Grider,

NSPI San Diego President
(888-269-1589)

25th Annual Pool & Spa of the Year

OFFICIAL ENTRY FORM

Entry #

(for NSPI use only)

Category

<i>Pool/ Spa/ Water Feature Size:</i>	<i>Width</i>	<i>Length</i>	<i>Depth</i>
		<i>Perimeter</i>	<i>Square Footage</i>

Special Features:

Subcontractors (company & phone)

Has this project been submitted previously in the awards competition?

Yes

No

Is this project built/installed in accordance with current NSPI/ANSI approved standards and mandatory codes enacted by a government having jurisdiction over the site of the installation?

Yes

No

CATEGORIES

A	Concrete Pool	0 - 400 square feet
B	Concrete Pool	401 - 500 square feet
C	Concrete Pool	501 - 600 square feet
D	Concrete Pool	601 - 700 square feet
E	Concrete Pool	Over 700 square feet
F	Concrete Pool	Commercial Project
G	Concrete Pool	Natural Design
H	Concrete Pool	Unique Design
I	Water Feature	Must have separate plumbing and be a separate entity
J	Concrete Spa	Must have separate plumbing and be a separate entity
K	Manufactured Spa	Spa manufacturer must be listed on entry form under "Equipment"
L	Remodel	Before and After photos must be submitted
M	Vinyl Liner Pool	Liner manufacturer must be listed on entry form under "Equipment"
N	Safety Cover Pool	Cover manufacturer must be listed on entry

Entry Submissions - Each entry must contain the following:

- Entry fee of \$45.00 per entry.
- Two 8x10 or 8x12 color photographs, showing two views of the project. (To be used for judging. In the event your project wins and you have a preference which view should be used for your award plaque, mark it with a "P" on the reverse side of the photo.)
- Two color slides, showing the same views as the photos. (To be used for the slide show at the awards banquet.)

Four color photographs of each view, any size. (To be submitted for publication in magazines and/or newspapers.)

Entry Qualifications

- Builder submitting entry must be a member of the San Diego Chapter NSPI.
- Entered project must be located in San Diego County.
- You may submit a maximum of two entries in each category.
- Each entry must be entered in the proper category.

A project may be resubmitted in subsequent competitions if it meets all the qualifications and has not won an award in previous years' competitions.

Deadline for Entries: September 15, 1999

Awards Banquet will be held October 23, 1999

Entrapment Cases Continue to Alarm Industry Observers

(from Aqua Magazine July 1999)

Sally Jessy Raphael did a show on June 10. The theme: "Is Your Child Safe?" She covered incidents of drain entrapment and diving injuries. Within a few weeks two instances of kids getting trapped by drains were reported.

One speaker, Sandy Garber, whose son became trapped in the family's spa two years ago, is now active in promoting the use of anti-entrapment devices and was fundamental in the development of the Vac-Alert Valve, which responds to an increase in vacuum by inducing air into the plumbing.

Four days after the show, 6-year-old Jeremy Belotto of Fort Lauderdale, Fla., was playing in his family's spa when he became trapped by the bottom 1-by-2-inch drain.

According to reports, he was under the water for about a minute before the pump was shut off. He was taken to a hospital where he was treated for injuries to his abdomen, then later released in good

condition.

A week later, 10-year-old Harmony Tobin drowned. Her hair was trapped by a return line in a municipal pool. A 6-inch wide pipe on an open filtration system used by the pool caused the entrapment. Lifeguards could not pull Tobin from the pipe due to the suction. Firefighters finally freed her by smashing the PVC pipe, which was exposed on the deck.

One Park Board member, said she had warned the city a year ago that the pool was unsafe but was told the city didn't have time to inspect it.

The parents of Harmony Tobin are currently gathering evidence for a lawsuit against the city.

Turning off the pump alone is not enough to relieve the suction vacuum when drain blockage occurs. Atmospheric pressure needs to be introduced into the system to break the force of the flowing water.

POOL PAK IS ENDORSED BY THE NATIONAL SPA AND POOL INSTITUTE REGION XI

ARTISAN PAK

In 1681, on the outskirts of London, in a small coffeehouse known as Lloyd's, several men put up their capital to ensure the safe voyage of the vessels at sea. A promise to ensure was drafted, and the men signed their names under this promise.

That is the history of the first generation of underwriters.

We are HDR Insurance Services, underwriters for the NSPI Pool Pak program, and here is our promise to you.

HDR Insurance Services, in cooperation with INSCORP and our agents around the state, is committed to offering our insureds the highest quality insurance program available. Customer focus will be our first priority as we continually strive to satisfy our policyholder's insurance-related needs.

NSPI, we are your HDR Insurance Services underwriters, We thank you and your agent for placing your coverage and trust with us.

September Meeting San Diego NSPI

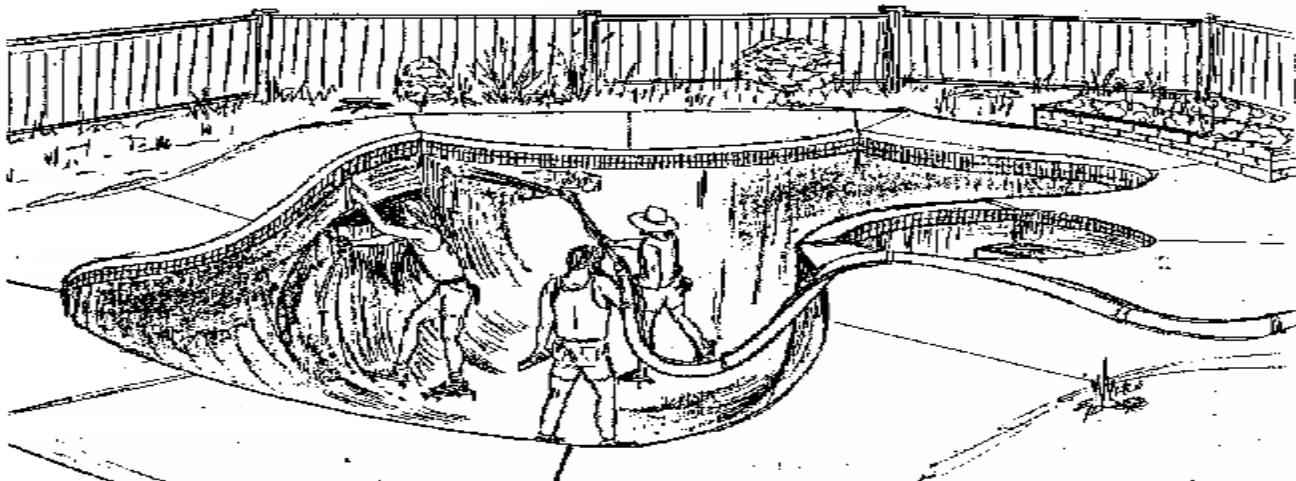

SPECIAL EVENT AVOIDING PLASTER RELATED

The last time that we held this event there was standing room only. So please call for reservations ASAP.

There will be two speakers:

- Randy Dukes of Aquavations, Miami, Fla. is a manufacturer of pre-blended exposed aggregate surfaces.
- David Grider of Noble Tile, Anaheim has been involved with installing, servicing and selling plaster and exposed aggregate products for the last 12 years.

September 14, 1999 - San Diego Hilton - 6:30 Pm

Food and Beverage will be served
FREE! FREE!

Only if reservations are made by 5:00 PM Friday September 9.

888-269-1589

Growing requirements for swimming pool and spa safety have created the need for trained technicians with the skills and specialized tools to perform electrical tests on swimming pools and spas. This testing procedure is not only a service to the owner and user, but is an expanding and financially sound business for technicians.

PacFab, Inc. is proud to sponsor Dr. E.P. Hamilton III, one of the developers of the swimming pool and spa electrical test equipment and procedures.

Those who complete this one day class will be trained in basic PSEQT test procedures, including a hands-on field testing of a pool using the PSEQT Kit.

Classroom technical information is presented in an easy to follow format with step by step instruction on testing procedures. You will leave this course with valuable information and skills that you can profitably put to work.

Upon completion of the course you will receive:

- A special opportunity to purchase the Pool/Spa Electrical Qualification Test Kit.
 - Technical manuals
 - Certificate of completion
 - Patch for your shirt or jacket
- Course hours are 8:00AM to 6:00PM.

Register Early (space is limited)

The nature of the training course requires that the seminar be limited to 20 persons. You will receive a confirmation by phone.

Saturday, October 16, 1999

Doubletree Hotel
2001 Point West Way
Sacramento, CA 95815
(916) 929-8855

Monday, October 18, 1999

Holiday Inn Select North Miramar
9335 Kearny Mesa Road
San Diego, CA 92126
(619) 695-2300

Upon space availability, rooms can be reserved for the evening prior to the event at the preferred rate of \$109.00

This training program would normally cost \$250. PacFab, Inc., as sponsor, has arranged to bring this valuable opportunity to you for only \$149, including lunch and course training materials.

For information or questions call:
Robin @ (805) 523-2400 x ext. 247

Mail Registration to:
E.P.H.A. Electrical Testing Course

Electrical Testing For Pools and Spas

ABOUT THE PRESENTER.....

E.P. (Bill) Hamilton III, Ph.D. and his E. P. Hamilton & Associates Engineering staff are one of the developers of electrical testing equipment and procedures for swimming pools and spas. Dr. Hamilton is a graduate of the University of Southern California and received his Ph.D. in engineering from the University of Texas at Austin. He heads E.P. Hamilton and Associates, Inc., an engineering firm in Austin, Texas which specializes in commercial electrical systems design, electrical and electronic design, and failure analysis. Dr. Hamilton, "Bill", has taught at the University of Texas, University of Southern California, and Baylor University.

Conducted by:
E. P. Hamilton & Assoc. Inc.

Sponsored by:
PacFab, Inc.

Bill and the E. P. Hamilton & Associates Engineering staff were responsible for a significant portion of the development work on the PSEQT Kit, including numerous analyses and troubleshooting of electrical systems on pools.

Sponsored by

**POOL / Spa Electrical
Qualifications Test Kit
(PSEQT)
Technical Training
Course**

This course has been accredited by NSPI for eight technical hours of continuing education credit.

Space is limited.

For Your Information. Some random stories in the news.

Pennsylvania Refill Ban

Source: York Daily Record

When Gov. Tom Ridge declared a drought emergency on July 20, Pennsylvanians were told to stop topping off their swimming pools. They had to dig a little deeper for the exceptions:

If it's a public pool that serves 25 or more households, then owners can top it off.

If it's owned by a health-care facility and used for patient care or rehabilitation, then it can be re filled.

If the owner of the pool - no matter who that person is - simply calls the public water supply system or private owner of the water source and asks, "May I top off my pool?" then that person can pull out a hose and fill 'er up.

So, if pool owners call their water supplier and get an OK, then topping off is legal.

Drought dries up pool industry; Construction on hold as builders, buyers fear water restrictions

Source: The Baltimore Sun: Brenda J. Buote and Edward Lee
Teresa Kostelec took out a second mortgage so she and her family could swim in their back yard. Now they are staring at a huge hole that might remain dry -- unless they pay perhaps hundreds of dollars extra.

But an expected announcement from Gov. Parris N. Glendening on water restrictions this week has everyone in the swimming pool industry worried- about the drought.

The governor called for voluntary water restrictions asking people not to fill or top off pools. It has not been determined whether that will be mandatory. Pool buyers are hoping that he will exempt newly built swimming pools, as Pennsylvania did.

Pool contractors cannot finish building a pool unless they can fill it. Otherwise the concrete holding the pool together can crack. Many are putting their projects on hold until they are certain water will be available.

Pool sales coming along swimmingly

Source: Chicago Sun-Times

Swimming pool installations are on the rise in the Chicago area and the rest of the nation along with disposable income, new housing and a relentless pursuit of amusement.

Many homeowners are favoring rustic pools that often include mini-rapids, fountains, rock gardens and even pebbled bottoms. Industry officials say a strong economy is putting more cash into homeowner hands, coupled with a desire to "extend" the home into the backyard and provide family entertainment, is driving pool sales.

Chicago economist Evelina Tainer said there is certainly more disposable income these days but sees the jump in pool sales as part of a larger trend that has many Americans seeking a generally higher standard of living. She also noted the hot Midwestern summers and explosion of new housing.

In-ground pools in the Chicago region increased by about 10,000 - from 56,948 to 66,690 - between 1993 and 1998, according to the NSPI. Nationally, in-ground pool construction increased more than 14 percent from 1997 to 1998.

Firms are finding their customers want more variety in pools, and are willing to pay for it.

"The average pool we're building is \$60,000 to \$100,000," said the owner of Downes Swimming Pool Co. "We're the high end."

Downes said there is still a good number of rectangular pools

being built. They are easily fitted with mechanical safety covers

Ross receives pool patent

Source: The Knoxville News-Sentinel

Terence Ross, owner of Oak Ridge Swimming Pool Supplies Inc., was awarded a patent for a "device for isolating piping associated with a swimming pool."

The device allows for the introduction of chemicals into a swimming pool's plumbing that otherwise would be incompatible with the chemicals already used to treat the pool.

The device provides a way to kill numerous types of algae that are difficult to eradicate under normal treatment regimens, Ross said. For more information, contact Ross at Oak Ridge Pool Supplies in the West End Plaza off Oak Ridge Turnpike. The phone number is 483-9770.

Pool Delivers Electric Shock; Man, 31, Dies

Source: Los Angeles Daily News

A 31-year-old man died Sunday after rescuing his niece from a backyard pool that was charged with electricity, police said.

According to police: Several people were swimming in the pool when a submerged light fixture in the pool became dislodged, causing an electrical current to flow into the water.

Brian McGahan, 31, noticed his 14-year-old niece was in trouble and jumped in to help her. He died a short time later.

"The volume of electricity wasn't terribly strong in the pool, so we're not sure of the cause of death yet," Smith said.

"The electricity may have played a factor, but it is being listed as an accidental drowning."

The incident happened about 3 p.m. when the man jumped into the pool, said the Los Angeles City Fire spokesman .

Noticing McGahan was also in trouble, his wife dived into the deep end of the pool to rescue him and a neighbor administered cardiopulmonary resuscitation until paramedics arrived.

The wife told paramedics she suffered an electrical shock while in the water. Both adults and the girl were taken to Providence Holy Cross Medical Center, where McGahan died, Collis said.

The LAPD Foothill Station was investigating the accident, according to LAPD spokesman Don Cox.

Collis said paramedics who came to the home found a lawn chair at the bottom of the pool.

Shatner's Wife Found Dead in Pool

Source: Associated Press

LOS ANGELES (AP) -- The wife of "Star Trek" actor William Shatner was found dead in the swimming pool of their home, an apparent drowning that authorities said they were treating as an accident. The distraught Shatner said she "meant everything to me." Nerine Shatner, 40, was pronounced dead at the scene late Monday.

New book features dream pools

Source: Tulsa World

Heat wave or not, there are few things more pleasant than visiting a lovely private swimming pool. You can do so vicariously with "Dream Pools & Gardens," a new book by Francisco Asensio Cerver (Stewart, Tabori & Chang, 1999, \$50), director of a marketing and design agency in Barcelona, Spain.

There are stunning pools, pools that emphasize architecture, pools with waterfalls, pools for lounging and pools for exercise.

How to tell when someone is lying.

Interview of Charles V. Ford, MD, professor of psychiatry and director of the Neuropsychiatry Clinic at the University of Alabama at Birmingham School of Medicine. He is author of Lies! Lies!! Lies!!! The Psychology of Deceit, American Psychiatric Press, 800-368-5777 in Bottom Line Magazine

To detect lies focus on how it is being told to you, rather than on what is being told.

WHEN INTERVIEWING JOB CANDIDATES

Job hunters often bend the truth about prior income, work history and reasons for quitting. Big lies can be found by checking information on applications. Smaller ones call for sharp questioning.

Listen for a lack of verbal and physical spontaneity. They may sound wooden and automatic as they run through their rehearsed programs.

Interrupting them with specific questions will throw them off guard and make it easier to see the truth.

Watch for emblems of emotion: largely unconscious body movements, such as shrugs, grimaces, nods or frowns, that reveal what a person really thinks. When an emblem conflicts with what's being said, it suggests that they may not be saying what he really believes.

Examples: An initial head nod indicating yes may be a clue that the person's no response is a lie. Shrugging and then going on to state strong agreement may be a sign that the speaker is not so sure.

WHEN EMPLOYEES REPORT TO YOU

The yes-man phenomenon occurs with people who will do or say anything to please you, even if it means lying about what they really think. Other common forms of lying by staffers are overpromising and claiming to have done things that have not done.

Be inwardly analytical and skeptical of everything you hear.

Realize that employees tend to lie primarily in response to the first question and will not be prepared to lie beyond that.

Act in a trusting manner while subtly prodding for deceit by asking more questions. You should also examine your own unconscious wishes to be deceived and flattered, especially about your own ideas. If you really want honest feedback, you'll let your employees tell the truth.

Example: Instead of presenting your solution to a problem and asking for an opinion, say you have a possible solution and would appreciate hearing alternatives.

WHEN ON THE PHONE

Phone calls deprive us of visual lie-detection clues. But it frees us to tune in intently to language and voice clues and makes it easier to ask direct questions.

Talking on the phone also makes the other person more confident. It's much easier to lie when they don't have to face you.

Listen for signs of deceitful language, like endless patter of irrelevant and extraneous information. Liars create a lot of noise. They talk more than they should, hoping that any lies will be lost.

Slow them down by interjecting questions such as, I'm sorry, would you repeat that?

Once you get them slowed down, listen carefully to how they talk. When lying, they will hesitate, speak more slowly, use fewer words and may make more grammatical errors. And the pitch of their voices is likely to rise.
